Nirvana PLUS 2mm Cross-Linked Poly Foam Underlayment

SKU: #10023614 100 square feet per roll.
Dimensions: 4’ x 25’ x 1/16”.

For installation of floated flooring products only, such as:
Laminates*, click together or edge-glued engineered and click bamboo flooring.
* Not designed for use under Laminates with pre-attached cushion.

Installation Instructions:

1. Be sure the sub floor surface is flat, clean and dry*.
2. Roll the Nirvana Plus Underlayment out with the vapor barrier film side facing up and with the overlap edge against your starting wall (cut off this flap) run the underlayment an inch or so up the walls (the excess will be trimmed later). Apply or orient the underlayment in the same direction (length) as the new flooring.
3. Lay a second row of underlayment alongside the first, butting the edges together (do not overlap them) with the overlap flap facing the first row. The overlap film will lie over the adhesive strip from the first row.
4. Fold back the overlap flap to expose the peel and stick adhesive strip. Remove the white protective cover from the adhesive strip, and lay the overlap flap across the first row of underlayment. Press into place.
5. Repeat row by row until the entire floor area is covered.
6. Trim down excess material relatively close (1/8” -1/4”) to fit the perimeter of room using a sharp utility knife.
4. When cutting around obstacles or when end of roll seams are butted together seal seams with duct tape or a quality strapping tape.
5. Install flooring according to the flooring manufacturer’s installation instructions.

*Installations over concrete in high moisture areas (vapor emission rate above 3 lbs. / 1000 sq. ft. / 24 hrs. (As measured by Anhydrous Calcium Chloride Test) requires additional protection such as our 6 mil poly moisture barrier.

**NOTE: This product is not recommended for glue down or nail down applications.
